

FILE DROPPER

Secure File Sharing Platform

Fast • Secure • Controlled File Sharing

Presented By:

Amanprit Kaur Gedu &
Siddhi Ghodke

Roll No:

233005 & 233029

Course:

BBA (CA)

College Name:

Sarhad College

Academic Year:

2025–2026

INTRODUCTION

- File Dropper is a **secure** file sharing platform.
- It simplifies **uploading** and sharing files.
- Traditional methods lack proper **security** and control.
- Users can generate instant **shareable links**.
- Includes **password protection**, expiry, and download limits.

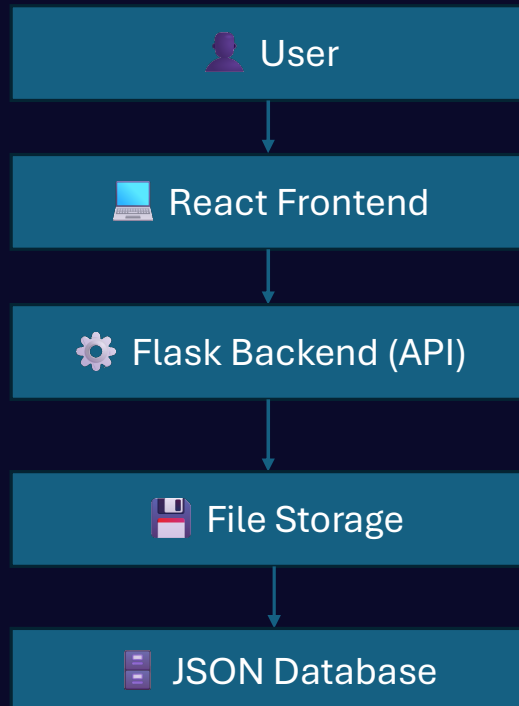

OBJECTIVES

- To provide **secure** file sharing.
- To simplify file upload and **download**.
- To enable generation of **shareable links**.
- To implement **password protection** and access control.
- To allow **expiry time** and download limits for files.

TECHNOLOGY STACK

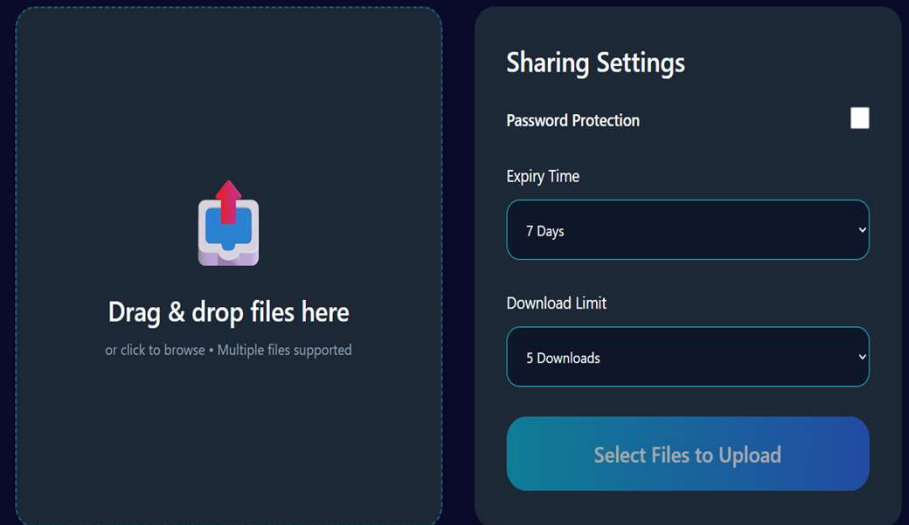

- **Frontend:** React.js with Tailwind CSS
- **Backend:** Flask (Python)
- **API Communication:** REST APIs
- **Storage:** Local File System
- **Database:** JSON-based data storage

SYSTEM ARCHITECTURE

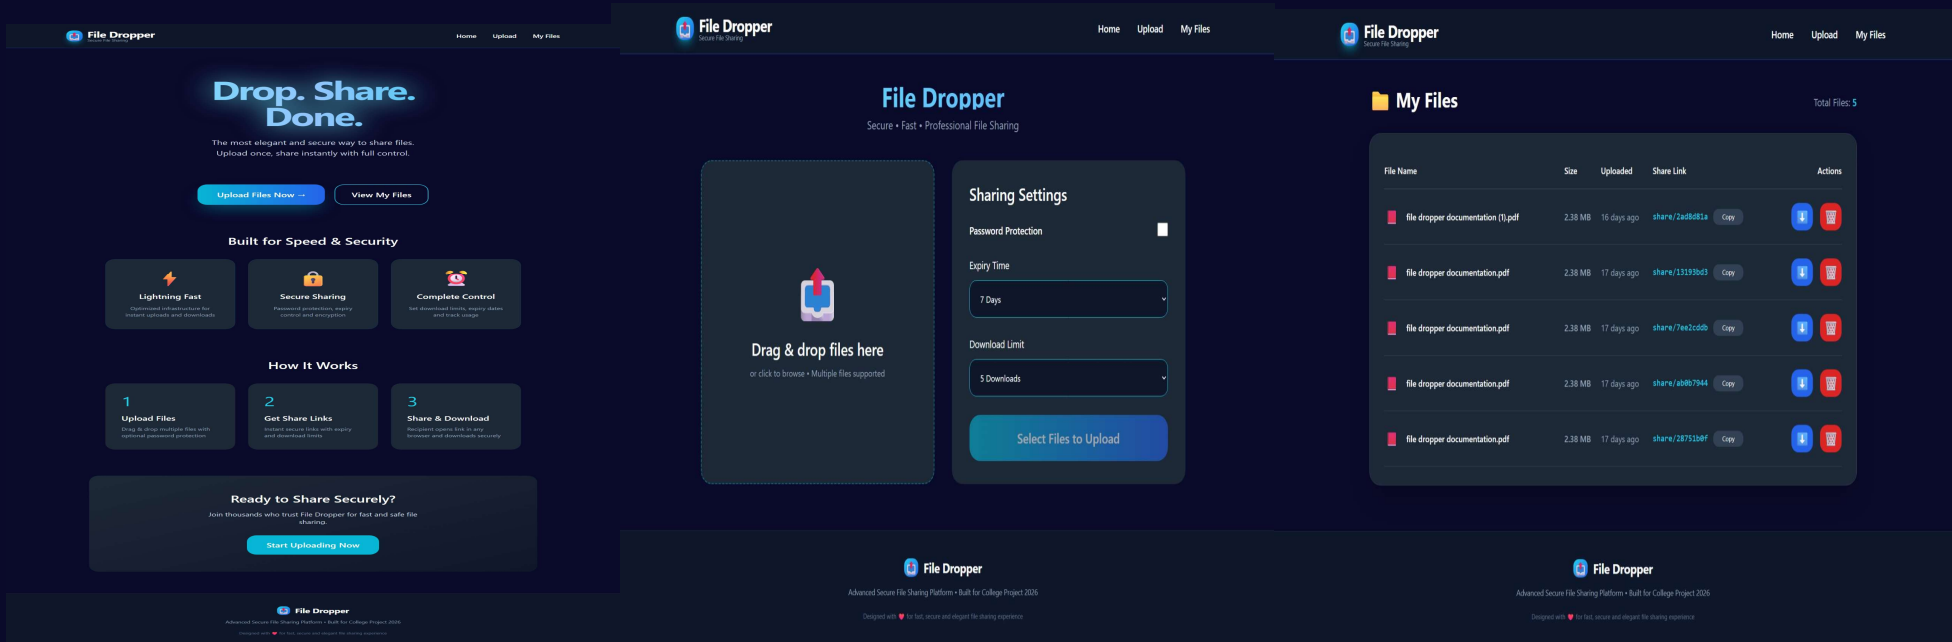

KEY FEATURES

- Secure file sharing
- Drag and drop file upload
- Instant shareable links
- Password protection
- Expiry time and download limits

File Upload Interface

MODULES / PAGES

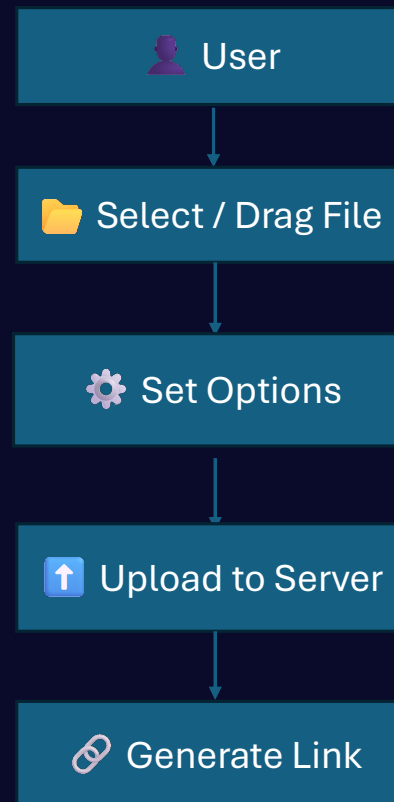

Home Page

Upload Page

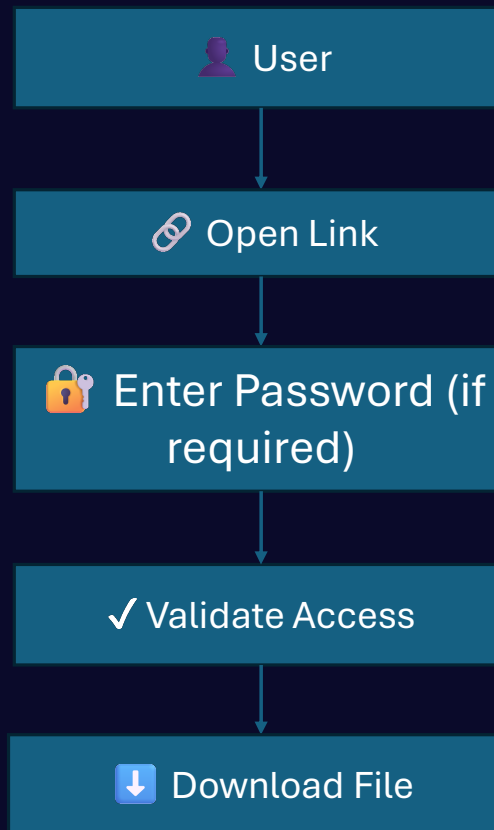

My Files Page

Files are shared using secure links generated after upload.

DOWNLOAD WORKFLOW

SECURITY FEATURES

Password Protection

Expiry Time

Download Limits

Secure Links

Validation

Prevention of Unauthorized Access

ADVANTAGES / BENEFITS

-  Easy to use
-  Fast sharing
-  Secure transfer

-  No login required
-  Saves time
-  Accessible anywhere

FUTURE SCOPE

-  Cloud Integration
-  User Authentication
-  File Encryption

-  Real-time Sharing
-  Mobile App
-  Analytics

CONCLUSION

- File Dropper provides a secure and efficient file sharing solution
- It simplifies uploading, managing, and sharing files
- Ensures data protection with advanced security features
- Improves user experience with fast and controlled access
- A scalable system with strong potential for future enhancements
